Electrostatic Dissipative & Conductive flooring systems are non-sparking mortars designed to protect the work environment against damage, injury, or financial loss associated with electrostatic discharge. This chemical resistant, seamless system provides a hardwearing, easily cleaned surface in sensitive electronic environments.

ADVANTAGES

- Abrasion, chemical & stain resistant
- High gloss and excellent cleanability
- 100% solids, low odor application
- Consistent electrical resistance readings:
 - Tested at 10 to 500 volts (dissipates a 5000 volt charge to zero in less than 0.1 sec @ 72°F and 12% relative humidity)

TYPICAL USES

- Medical equipment and devices
- Computer rooms
- Circuit board manufacturing facilities
- Aircraft hangers
- Electronic cleanrooms
- Any area requiring protection against electrostatic charge damage

Key Resin Company provides this color guide for preliminary color selection only. Please refer to a physical sample prior to making a final selection. Contact your local Key Resin Representative for assistance or contact the main office.
